

What's New in Centrify Identity Service: App Edition 15.4

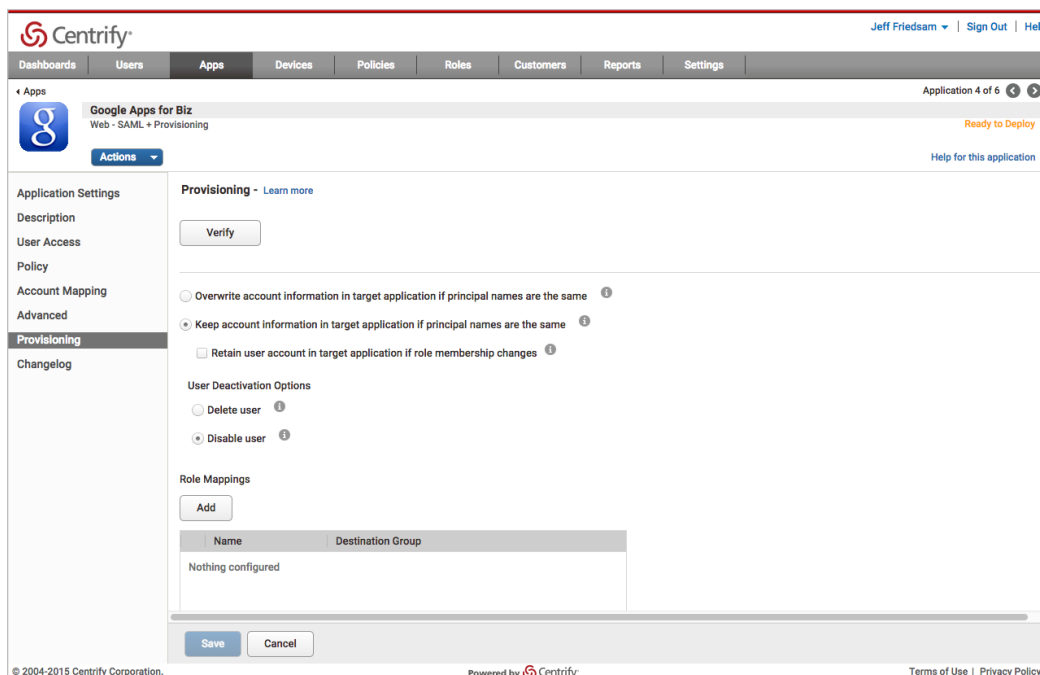

Centrify Identity Service, App Edition 15.4 includes several exciting new features and updates.

Platform and Application features:

De-provisioning support for Google Apps

Administrators can select new options when de-provisioning a user from Google Apps to determine license and data retention:

- Delete user (Removes user and data)
- Disable user (Keeps data intact)

Account Mapping, Policy and Advanced script "Test" Options

Application settings now include the ability to test account mapping, advanced login and application policy scripts against any user record to ensure correct output and enforced restrictions.

Description

User Access

Policy

Account Mapping

Advanced

Changelog

Account Mapping - [Learn more](#)

Map to User Accounts

Use the following Directory Service field to supply the user name

Everybody shares a single user name

Prompt the user for their user name

Use Account Mapping Script

Test

```
1 LoginUser.Username=LoginUser.Get('mail');
2 trace('Login User Mail Address :|' + LoginUser.Username);
3
4
```

User account mapping script for any user

Description

User Access

Policy

Account Mapping

Advanced

Changelog

Policy - [Learn more](#)

Restrict app to clients within the Corporate IP range

Require strong authentication

Script

Load Sample **Test**

```
1 /* Sample app policy script
2
3 Inputs to the policy:
4
5 application: This is the row from the application
6 table. You can specify columns with the
7 Get function. For column names, see the
8 Data Dictionary (available when you
9 modify a report in the Reports page).
10
11 For example:
12 var appname = application.Get("Name");
13
```

Policy script for any user

Apps

Boxcar
Web - User Password

Provisioning

Changelog

Provisioning - [Learn more](#)

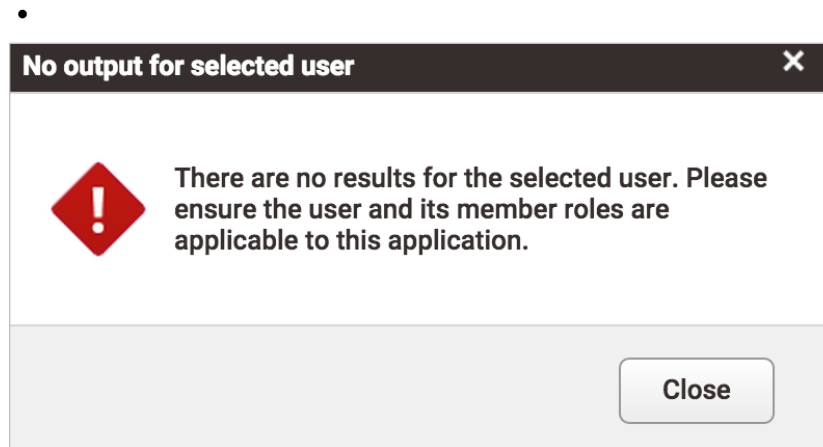

This feature is for advanced users only. Script modifications could result in

Test

Provisioning Script Editor

```
1 //#!
2
3 // Compulsory fields
4 destination.userName = source.DisplayName;
5 destination.email = source.Email;
6
7 // Option fields
8 destination.phone = source.OfficePhone;
9
```

For a provisioned user, it will show the info synced as per the script.

No output for selected user

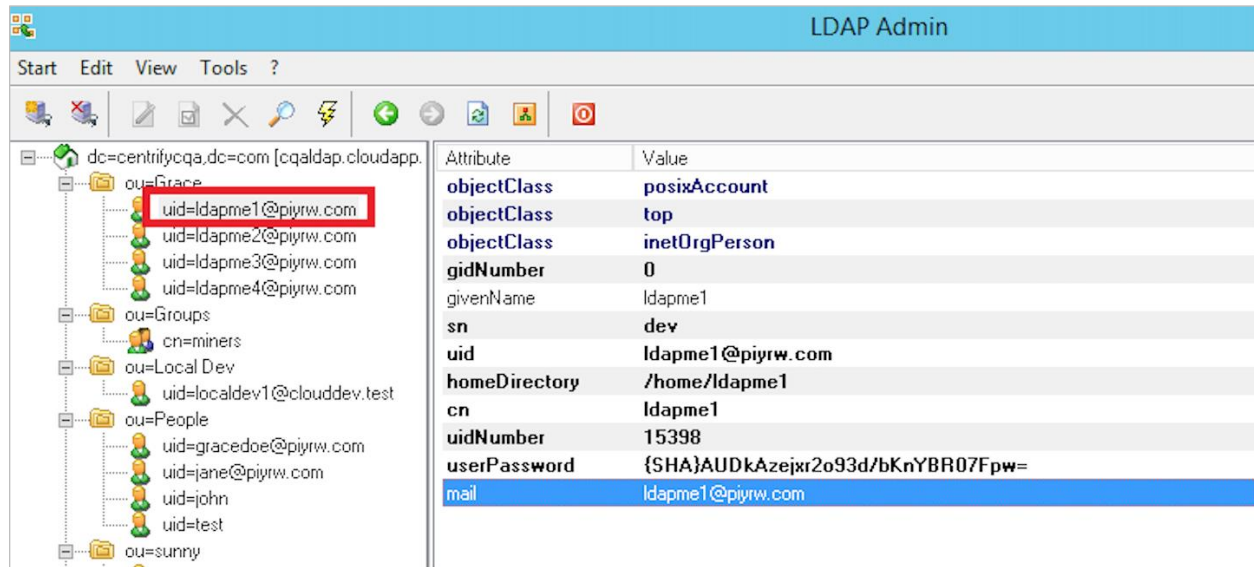

There are no results for the selected user. Please ensure the user and its member roles are applicable to this application.

Close

For a non-provisioned user, a message that user is not provisioned is shown.

Office 365 provisioning support for LDAP.

Centrify for Office 365 includes support for provisioning users from Active Directory, Centrify Directory Service (cloud) and now LDAP – or any combination of source directories.

The screenshot shows the LDAP Admin interface. On the left, a tree view displays the directory structure under 'dc=centrifycqa,dc=com [cqaldap.cloudapp.]'. The 'ou=Grace' folder is expanded, and the user 'uid=ldapme1@pijrw.com' is selected and highlighted with a red box. On the right, the 'Attribute Value' table displays the user's details:

| Attribute | Value |
|---------------|-----------------------------------|
| objectClass | posixAccount |
| objectClass | top |
| objectClass | inetOrgPerson |
| gidNumber | 0 |
| givenName | ldapme1 |
| sn | dev |
| uid | ldapme1@pijrw.com |
| homeDirectory | /home/ldapme1 |
| cn | ldapme1 |
| uidNumber | 15398 |
| userPassword | {SHA}AUDkAzejxr2o93d/bKnYBR07Fpw= |
| mail | ldapme1@pijrw.com |

Certified Support for ServiceNow SAML SSO and Provisioning

Centrify is officially certified for Single sign-on (SSO) and Automated provisioning and de-provisioning of users into ServiceNow.

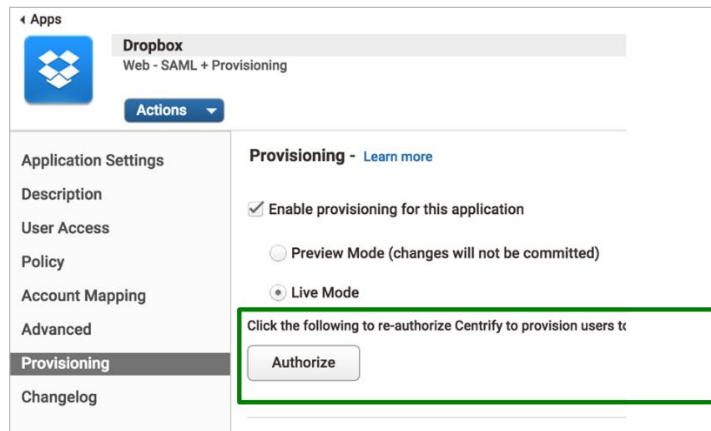

- Listed on <https://store.servicenow.com>
- <https://www.centrify.com/servicenow> has been updated to reflect the certification and mutual customer pricing

Support for Dropbox v2 API's

15.4 includes certified support of Dropbox v2 provisioning API's and leverages OAuth flow for API authorization

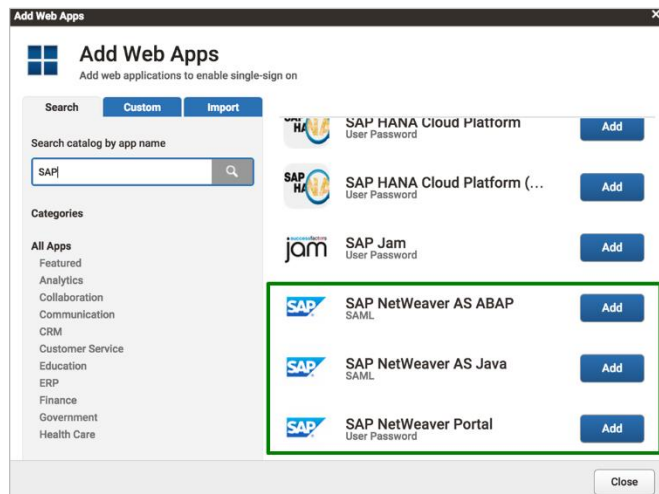

- Officially certified for Single sign-on (SSO) and Automated provisioning and de-provisioning of users into Dropbox
- Additional information is available on the Dropbox website at: <https://www.dropbox.com/business/resources/app-integrations#security>

On-premises SAP SAML Support for both SAP NetWeaver AS-Java and SAP Netweaver ABAP

Ability to configure On-premises SAP Netweaver AS-Java and ABAP via SAML are now available

- Ready to configure App templates in App Catalog
- Compatible with App Gateway

New Catalog Apps added!

The Centrify App Catalog has been updated with several new SAML and User/Password app templates that make deployment quick and easy.

- New SAML apps include SAP NetWeaver, Streetscape, Asentinal & Docurated
- Dozens of new User-Password app templates including British Airways, Creditsafe, Docurated, Strato, Orange, Trivago, My Vodaphone UK and many more!

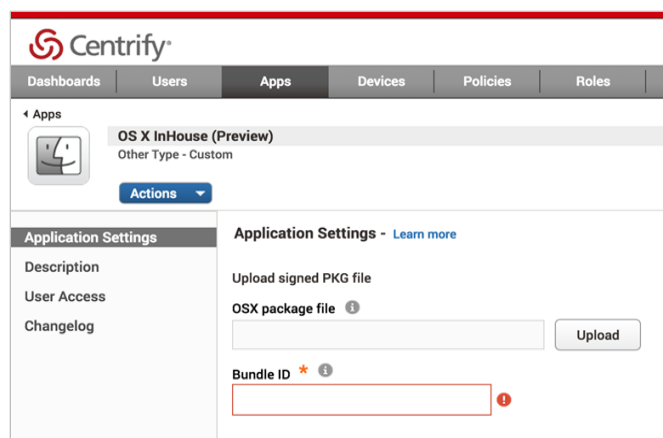

New SAML documentation is available in online help for easy configuration of the following apps:

- Amazon AWS (SAML)
- Amazon AWS (Proprietary)
- Lithium
- Cloudbees
- Blackboard Learn
- Evernote
- Elastica
- Kontiki

Mac App Management preview is now available

Applications for Mac can be distributed to OS X clients that are enrolled in the Centrify Identity Service. Administrators have the ability to upload .pkg files into the Cloud Manager for over-the-air deployment to end users.

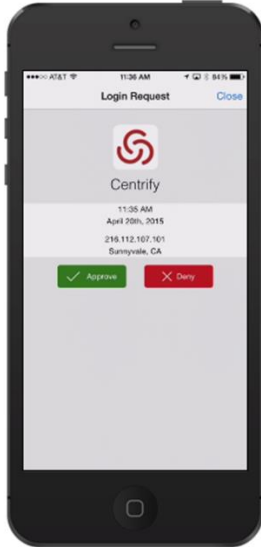

- Ability to distribute Mac apps for enrolled Macs
- .pkg files only this release (.app support coming)
- No optional app deployment / Company App Store supported in this preview release
- Auto-removal of apps is not currently supported in this preview release

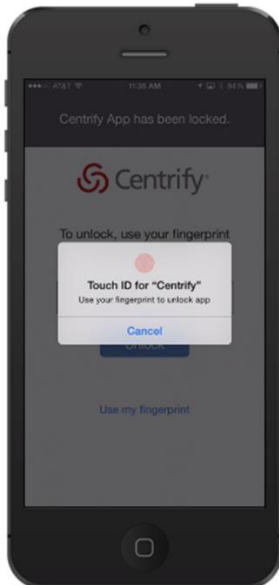

Mobile features:

New Centrify mobile app UI

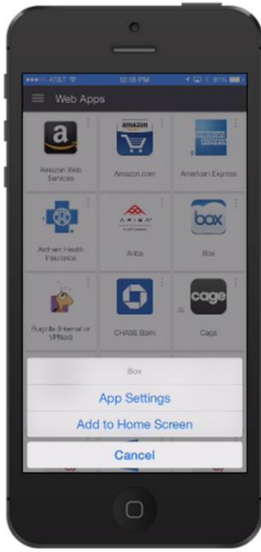

The Centrify mobile app has been redesigned to provide a cleaner user interface

- New Grid view for displaying Apps
- Cleaner interface conforming to the UI guidelines from Android and iOS
- New and prominent MFA push notification approval window

- Ability to lock the Centrify mobile app (auto-lock after x minutes or Lock on exit) via PIN or fingerprint on supported devices

- Ability to add application shortcuts to the device home screen

Contact Centrifly

Centrifly strengthens enterprise security by managing and securing user identities from cyber threats. As organizations expand IT resources and teams beyond their premises, identity is becoming the new security perimeter. With our platform of integrated software and cloud-based services, Centrifly uniquely [secures and unifies identity](#) for both privileged and end users across today's hybrid IT world of cloud, mobile and data center. The result is stronger security and compliance, improved business agility and enhanced user productivity through [single sign-on](#). Over 5000 customers, including half of the Fortune 50 and over 80 federal agencies, leverage Centrifly to secure their identity management. Learn more at www.centrifly.com.
