

Complete Cloud Security with Centrify + Skyhigh Networks

CENTRIFY ALLIANCE

Skyhigh Networks helps enterprises safely adopt cloud services by gaining visibility into use and risk of cloud services, detecting threats, and seamlessly enforcing DLP policies and encryption while leveraging your existing infrastructure. Skyhigh's patented Pervasive Cloud Control solution covers SAML-based redirection and enforces security, compliance and governance requirements on cloud usage without requiring agents.

Centrify Identity Service™ integrates with Skyhigh Networks to provide a unified identity platform that enables SaaS application security. By driving the authentication process through Centrify, Skyhigh Networks obtains the necessary information about users, their devices and their location to effectively manage access to and monitor user activity within cloud apps.

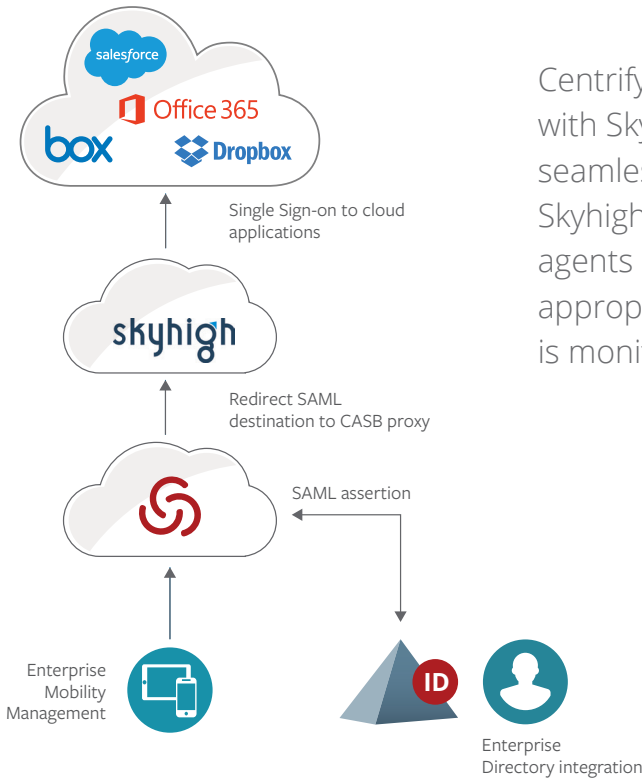

Centrify Identity Service integrates with Skyhigh Networks to provide a comprehensive solution for provisioning, governing, and securing enterprise cloud apps.

- Secure access to business-critical applications via directory integration
- Automatic provisioning and de-provisioning of users
- Application and mobile device provisioning & management
- Governance policies based on user identity, devices and locations
- Visibility into cloud usage, risk and gaps in policy enforcement
- Detect and respond to threats from insiders and compromised accounts, or malware and view a detailed audit trail for forensic investigations.
- Understand where sensitive data is in the cloud and enforce DLP policies
- Apply function-preserving encryption schemes to structured and unstructured data using enterprise-owned encryption keys

5000+ Customers, including 24 of the Fortune 50, rely on Centrify

Cloud Security Made Easy

Centrify's turnkey integration with Skyhigh provides seamless deployment of Skyhigh's solution without agents and ensures that the appropriate cloud app traffic is monitored and protected.

Try Centrify for Skyhigh — **Free!**

Free Edition for Skyhigh	
Single sign-on for cloud and mobile	Your single app
Active Directory, LDAP and/or Cloud-based authentication and administration	✓
Integrated Mobile Device Management	✓
Multi-factor authentication	✓
User Account Provisioning	✓
