

Centrify Privileged Access Service Self-Paced Training

Course Overview

Centrify Privileged Access Service (PAS) Self-Paced Technical Training prepares your IT and security teams to successfully plan, install, configure and manage the Centrify Identity-Centric PAM solution. You will learn more about what Centrify is and how our solutions can benefit your organization.

Students who attend the self-paced training will receive experience of installing the Centrify Privileged Access Service into an Active Directory (AD) environment; configuring the solution to manage Windows and UNIX based systems and users — configuring access for AD accounts to access UNIX systems using a role- based access methodology, password vaulting and multi-factor authentication.

Who Should Attend This Course?

System Administrators, System Engineers, Implementation Consultants, Solution Architects

Course Format

This self-paced remote training course is delivered through Centrify University and includes virtual presentations and recorded technical demonstrations of each lab exercises. Students will use their own computers to remotely connect to the training and can download a student and lab guide to use during the course and after the course to practice in their own training environment.

Prerequisites

Students should have a basic understanding of Identity and Access Management (IAM), Active Directory and UNIX operating system commands.

COURSE AGENDA

DAY 1	DAY 2
UNIT 1: Centrify Fundamentals <ul style="list-style-type: none">• Understanding Attack Vectors• Zero Trust Privilege• Centrify Privileged Access Service Architecture• Planning for Centrify Privileged Access Service• Licensing Options UNIT 2: PAS Configuration <ul style="list-style-type: none">• Installation Options• Installation of Centrify Privileged Access Service• Centrify Connector Gateway• Global Configuration Settings• Domain Administration• Portal Overview UNIT 3: PAS Administrative Operations <ul style="list-style-type: none">• Computer and User Roles• Rights and Permissions• Domains, Policies and Profiles• Importing Systems• Discovering Systems and Users• Working with Sets• Understanding Account and System Objects• Vaulting Passwords• Secrets	UNIT 4: PAS User Management <ul style="list-style-type: none">• Password Check-Out, Check-In and Rotation• Multi-factor Authentication• Request and Approval Workflow• Account Lockout• Password Self-Service UNIT 5: PAS Monitoring, Maintenance & Troubleshooting <ul style="list-style-type: none">• Session Monitoring• Gateway Session Auditing• Reporting• Scaling• Troubleshooting Centrify Privileged Access Service

Format: Self-Paced E-Learning (CBT)
Duration: Self-Paced (available for 180 days)
Price: \$1,000 per student
