

Fortinet and Centrify Integrated Security Solution

Security Without Compromise with Zero Trust Privilege Services

The rapid adoption and proliferation of mobile devices, apps, and services in enterprises today have many business and productivity benefits. However, the mobility revolution brings new challenges to IT organizations, especially in the security area. There is great diversity of endpoints, applications, and services, and employees typically need to authenticate with a wide variety of systems or services representing another silo of identity for IT to manage.

Security considerations are paramount, given the loss of valuable data and intellectual property resulting from unauthorized network access and the presence of new, evolving and increasingly sophisticated threats in today's globally connected networks. The evolving regulatory climate and growing number of stakeholders that require access to enterprise resources drive the demand for centralized, automated identity management and access control.

In today's brave new world of SaaS (Software-as-a-Service) and mobility, an enterprise's users, apps, content, and systems are no longer "behind the firewall." IT organizations have to address these challenges:

- Effectively manage and secure content in the cloud.
- Secure remote access for outsourced IT and administrative staff.
- Manage identity and control access across platforms.

Fortinet and Centrify have partnered to deliver an industry-leading security solution to address these challenges. Centrify Zero Trust Privilege Services help organizations grant least privilege access based on verifying who is requesting access, the context of the request, and the risk of the access environment.

KEY BENEFITS

- Improve security by eliminating easily cracked, recycled, or improperly stored passwords.
- Keep sensitive directory info where you want it: on-site in LDAP or Active Directory, in cloud, or any combination.
- Get unparalleled security protection with the industry's best validated security protection.
- Leverage Global Threat Intelligence to protect individual customers, using Fortinet's FortiGuard Security Subscription Services.

Fortinet's award-winning FortiGate Enterprise Firewall Platform provides the industry's highest-performing firewall capabilities, and Fortinet's FortiGuard Security Subscription Services provide the industry's highest level of threat research, intelligence, and analytics. Bringing the Fortinet and Centrify products together into one integrated solution delivers an identity management solution to enterprise customers with unparalleled security protection.

The Solution

Centrify is redefining the legacy approach to Privileged Access Management by delivering cloud-ready Zero Trust Privilege to secure access to infrastructure, DevOps, cloud, containers, Big Data and other modern enterprise use cases.

As traditional network perimeters dissolve, organizations must discard the old model of "trust but verify" which relied on well-defined boundaries. Zero Trust mandates a "never trust, always verify, enforce least privilege" approach to privileged access, from inside or outside the network.

Centrify Zero Trust Privilege helps customers grant least privilege access based on verifying who is requesting access, the context of the request, and the risk of the access environment. By implementing least privilege access, Centrify minimizes the attack surface, improves audit and compliance visibility, and reduces risk, complexity and costs for the modern, hybrid enterprise.

PROFESSIONAL SERVICES

Complementing Centrify Zero Trust Privilege Services in the integrated solution is Fortinet's award-winning FortiGate Enterprise Firewall Platform, which provides end-to-end security services across the entire network. This is strengthened by Fortinet's FortiGuard Security Subscription Services which provide the industry's highest level of threat research, intelligence, and analytics. The solution leverages Global Threat Intelligence to protect individual customers, by using FortiGuard to enable visibility and control for next-generation protection against advanced threats, including zero-day attacks.

By combining Centrify Zero Trust Privilege Services with the best security protection provided by Fortinet, the combined solution delivers security without compromise.

Leverage the Fortinet and Centrify integrated solution to enjoy improved business agility and enhanced user productivity, while ensuring the highest levels of security protection and compliance in your organization.

Our mission is to stop the leading cause of breaches – privileged access abuse. Centrify empowers our customers with a cloud-ready Zero Trust Privilege approach to secure access to infrastructure, DevOps, cloud, containers, Big Data and other modern enterprise use cases.
